

SCIENTIFIC WORKSHOPS & INTERCHANGES

Advancements in the Treatment of Keratinocyte Carcinomas: An OncLive® Scientific Interchange and Workshop

Objectives

- Determine the unmet medical needs in patients with advanced keratinocyte carcinomas
 - Identify potential opportunities for systemic therapies in CSCC and other keratinocyte carcinomas
 - Obtain feedback on safety and efficacy data on new and emerging agents for advanced CSCC
 - Identify patient factors that influence clinical decision making and planning for patients with advanced keratinocyte carcinomas
- Discuss clinical challenges and areas of uncertainty faced when selecting systemic therapies for patients with advanced disease (ie, chemotherapy, immunotherapy, cetuximab)
