

SCIENTIFIC WORKSHOPS & INTERCHANGES

Metastatic NSCLC Workshop: Applying New Data to Patient Care

Objectives

- Discuss how new data and approvals affect the overall treatment landscape for metastatic NSCLC
- Explore factors that influence your treatment selection and overall treatment planning, particularly with respect to immunotherapy regimens and antiangiogenic therapies
- Understand how first-line agent(s) and resulting outcomes factor into your selection of second and subsequent lines of therapy
- Evaluate rationales and opportunities for potential use of antiangiogenic therapy and immunotherapy, alone or in combinations
